Demographic Survey
Context-aware intelligent and adaptive user interfaces for MR and mobile applications
(This project is sponsored by UBCO Irving K. Barber Faculty of Science)

Principal Investigators
Dr. Barrett Ens (Associate Professor) barrett.ens@ubc.ca
Irving K. Barber Faculty of Science, UBC Okanagan

Collaborators
Zhenbang He (Graduate Student) zbhe96@student.ubc.ca

Demographic Survey

Section: Participant Background

1. **What is your age group?** *(Single choice)*

- Under 18 (not eligible to participate)
- 18–24
- 25–34
- 35–44
- 45–54
- 55–64
- 65 or older

2. **Gender** *(Single choice)*

- Female
- Male
- Non-binary / Third gender
- Prefer not to say

3. **What is the highest level of education you have completed?** *(Single choice)*

- High school or equivalent
- Some college or technical training
- Bachelor's degree
- Master's degree
- Doctoral degree
- Other (short answer if selected)

4. **What is your field of study or professional background?** *(Short answer)*

Section: Technology Familiarity

5. **How familiar are you with user interfaces in mobile or web applications?** *(Single choice)*

- Not at all familiar
- Slightly familiar
- Moderately familiar
- Very familiar
- Extremely familiar

6. **How frequently do you use digital applications (mobile/web) in your daily life?** *(Single choice)*

- Rarely (less than once a day)
- Occasionally (1–3 times per day)
- Frequently (4–10 times per day)
- Very Frequently (more than 10 times per day)

7. **Do you have experience in any of the following areas?** *(Checkboxes)*

- UI/UX design
- Front-end development
- Cognitive psychology / HCI research
- Graphic design or visual arts
- None of the above

8. **Have you previously participated in any UI or usability research studies?** *(Single choice)*

- Yes
- No

Section: Preferences and Accessibility

9. **Which type of UI design do you generally prefer?** *(Single choice)*

- Minimal and simple interfaces with fewer elements
- Informative and detailed interfaces, even if they appear complex
- Adaptive interfaces that change based on context or task

- I don't have a strong preference

10. **Have you ever felt confused or overwhelmed by the layout or complexity of user interfaces in digital applications?** *(Single choice)*

- Frequently
- Sometimes
- Rarely
- Never
- Not sure

11. **When using an unfamiliar interface, which of the following do you find most helpful?** *(Checkboxes, limit selection to 2)*

- Visual hierarchy (e.g., color, size, layout)
- Tooltips or pop-up hints
- Step-by-step onboarding or tutorials
- Search functionality
- Consistent layout patterns
- I usually don't need assistance

12. **Do you have any visual, motor, or cognitive impairments that may affect your interaction with user interfaces?** *(Single choice)*

- Yes (short answer if selected)
- No
- Prefer not to say

Section: XR Experience

13. **How familiar are you with XR technologies (AR/VR/MR)?** *(Single choice)*

- Not familiar at all
- Slightly familiar (have heard of it but never used)
- Moderately familiar (have used AR/VR apps occasionally)
- Very familiar (frequently use or develop XR applications)
- Expert level (researcher or developer in the XR field)

14. **How often do you use XR devices or applications (e.g., AR apps, VR headsets like Quest/HTC Vive)?** *(Single choice)*

- Never
- Occasionally (once every few months)
- Monthly

- Weekly
- Daily
