📊 UI Complexity Experiment Guide

👋 **Welcome to the UI Complexity Measurement Experiment**

🕑 **Total Duration:** Approximately **1 hour**

📌 **Total Tasks: 5 Tasks**

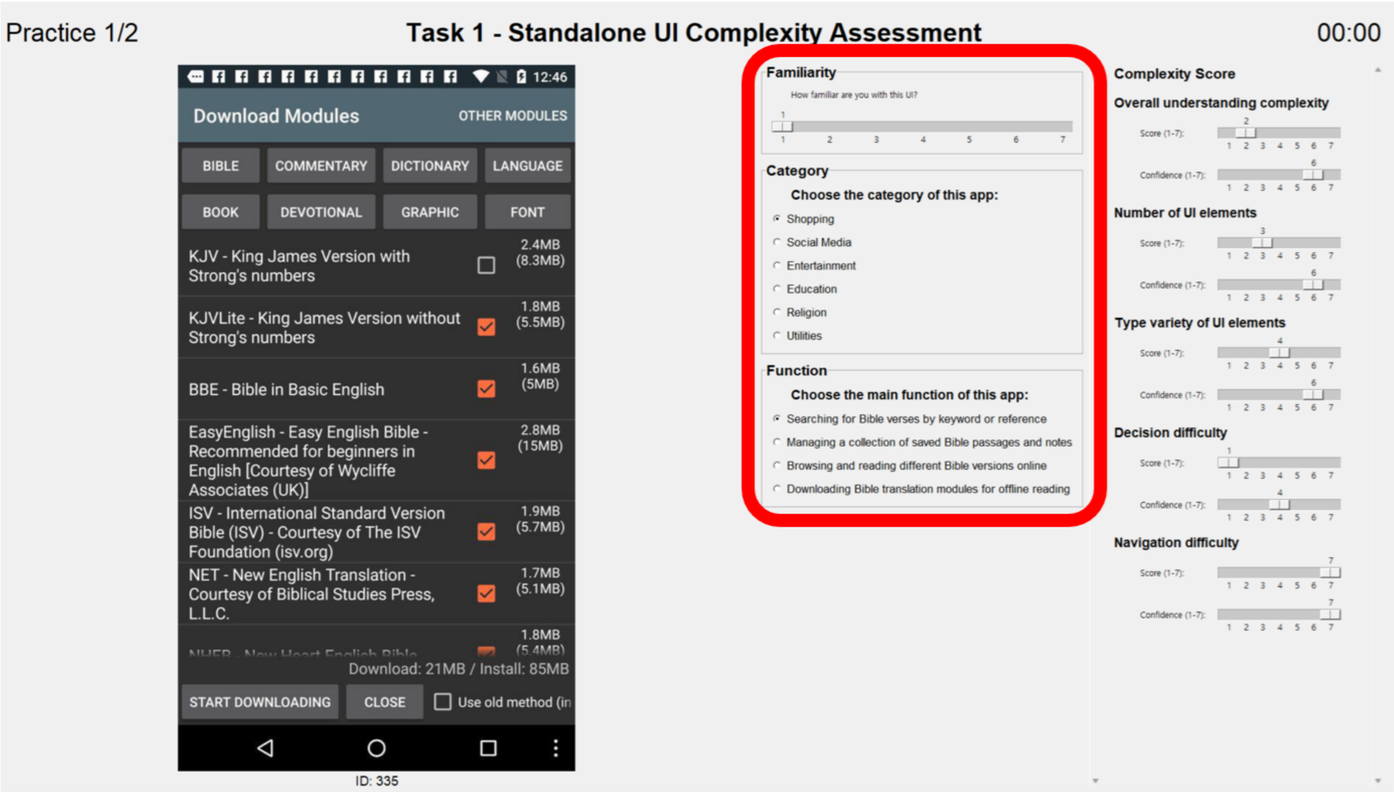
➡️ Please follow the instructions for each task and answer the questions accordingly.

🧪 Task 1 — UI Understanding & Evaluation

👀 Look at the UI displayed on the left and answer the questions

📍 Screen Information

- **Top Left → Remaining Tasks**
- **Top Right → Time (You do NOT need to worry about it)**



✏️ Answer in the Following Order

➡️ Familiarity → Category → Function

1️⃣ Familiarity

→ Rate **how familiar the UI is to you**
(e.g., you have used it before or seen similar interfaces)

2️⃣ Category

→ Select which **app category** you think this UI belongs to

3️⃣ Function

→ Select what **function you think the current UI performs**

🧪 Task 1 — UI Understanding & Evaluation

📊 Complexity Score Evaluation

For each item, **rate the level of complexity/difficulty** and also indicate your **confidence level**.

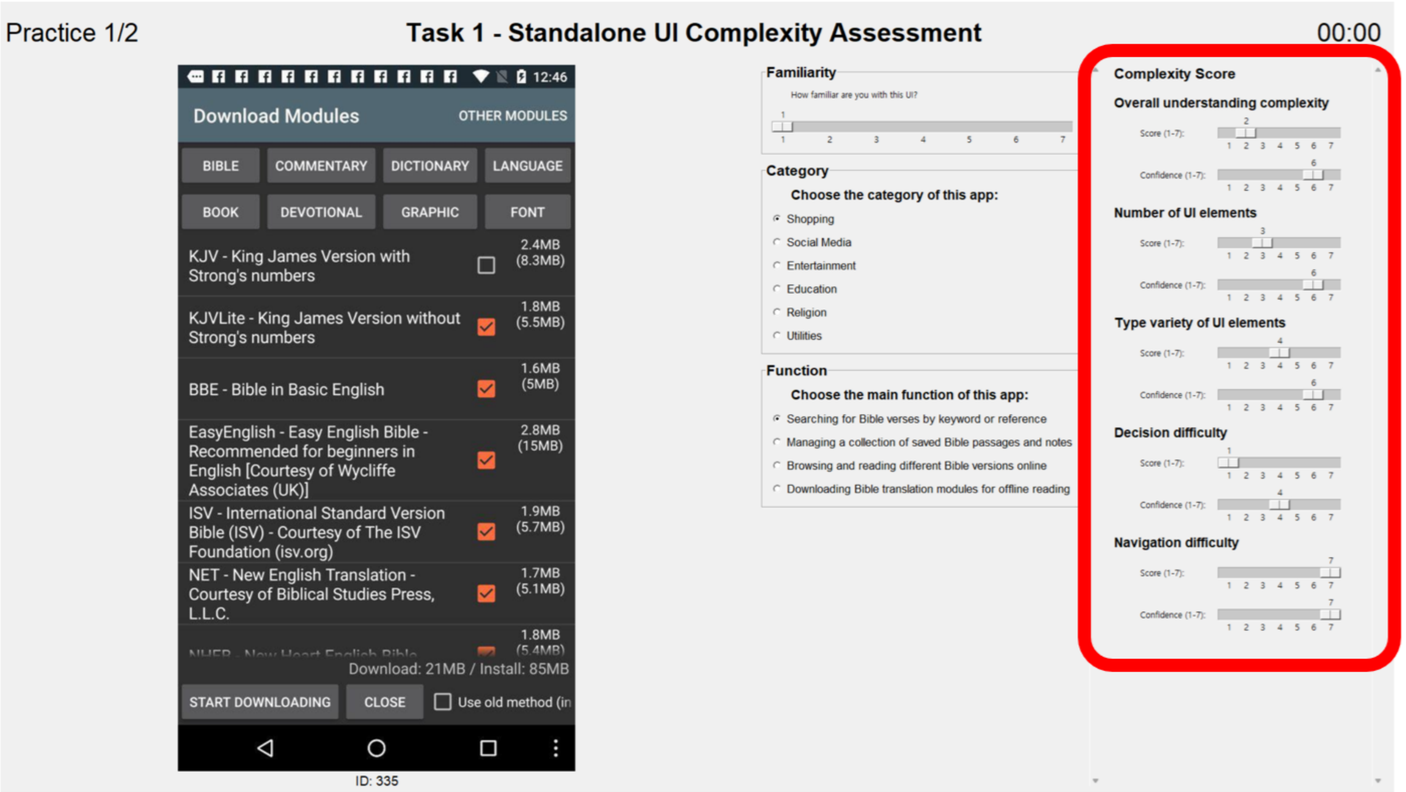
Overall Understanding Complexity
→ Overall **difficulty of understanding the UI**

Number of UI Elements
→ Complexity caused by the **number of UI elements**

Type Variety of UI Elements
→ Complexity caused by the **variety of UI element types**

Decision Difficulty
→ How difficult it is to **make decisions using this UI**

Navigation Difficulty
→ How difficult it seems to **navigate within the app**

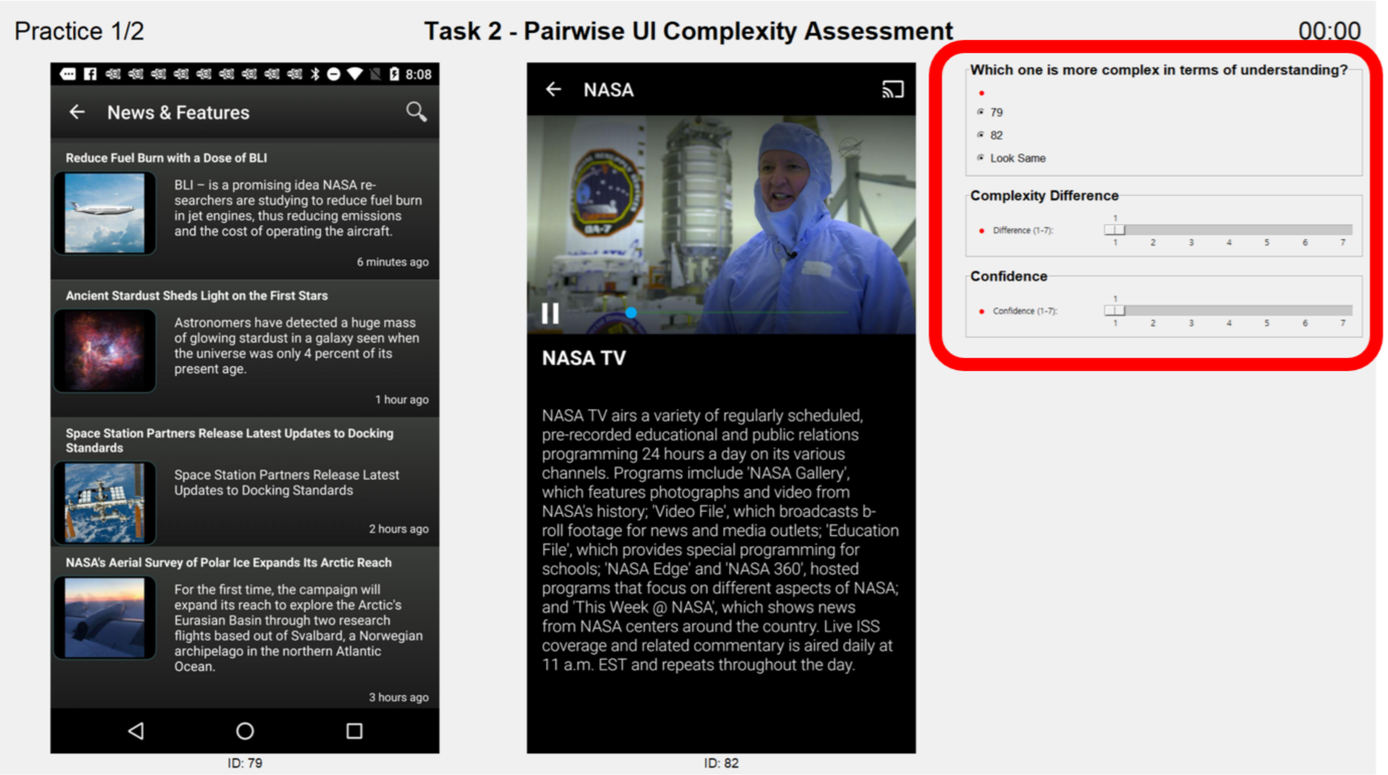


🧪 Task 2 — UI Complexity Comparison

👀 **Look at the <u>two UIs</u> displayed on the left and answer the questions**

📍 **Screen Information**

- **Top Left → Remaining Tasks**
- **Top Right → Time (You do NOT need to worry about it)**



📝 Answer Criteria

1️⃣ **Select the More Complex UI among 3 options**

2️⃣ **Complexity Difference**

→ Rate the **difference in complexity between the two UIs**

3️⃣ **Confidence**

→ Rate **how confident you are about your answer**

🧪 Task 3 — Rank UI Complexity (6 UIs)

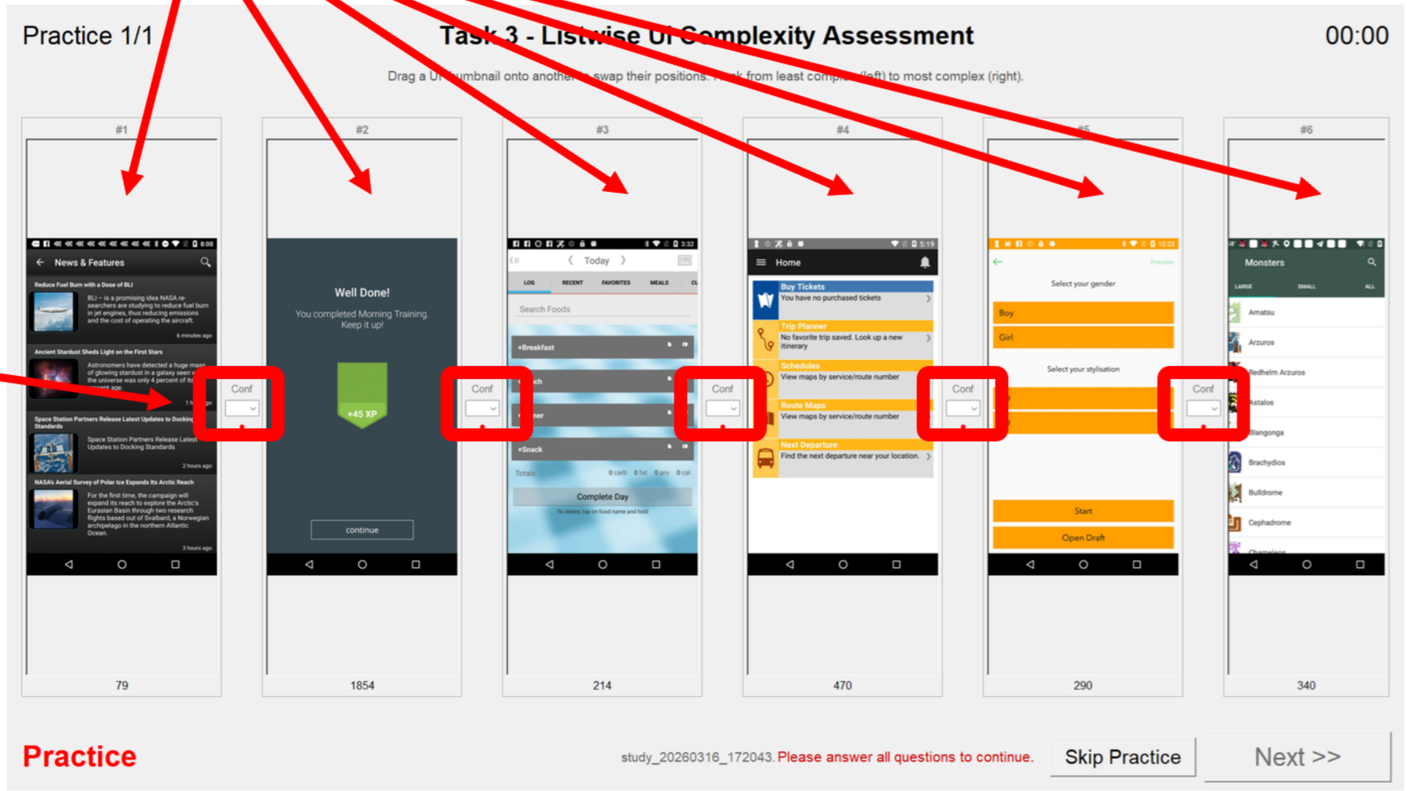
👀 **Look at the 6 UIs**

➡️ **Drag and drop them to rank <u>from least complex to most complex</u>**

📊 Confidence Input

For the **Conf list**, rate the certainty between adjacent UIs:

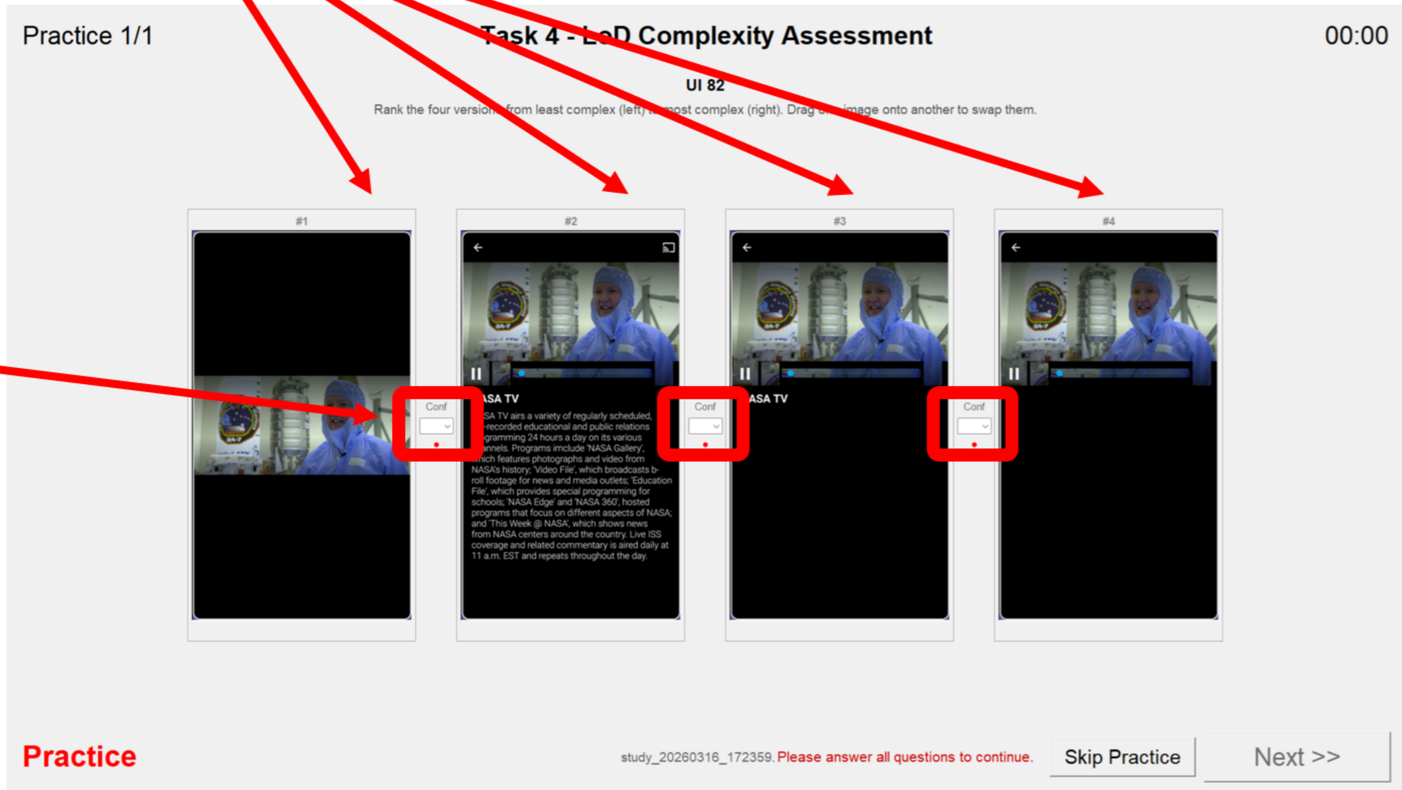
7 → The complexity difference is very clear
1 → The difference is unclear or ambiguous



🧪 Task 4 — Rank UI Complexity (4 UIs)

👀 **Look at the 4 UIs**

➡️ **Drag and drop them to rank <u>from least complex to most complex</u>**



📊 Confidence Input

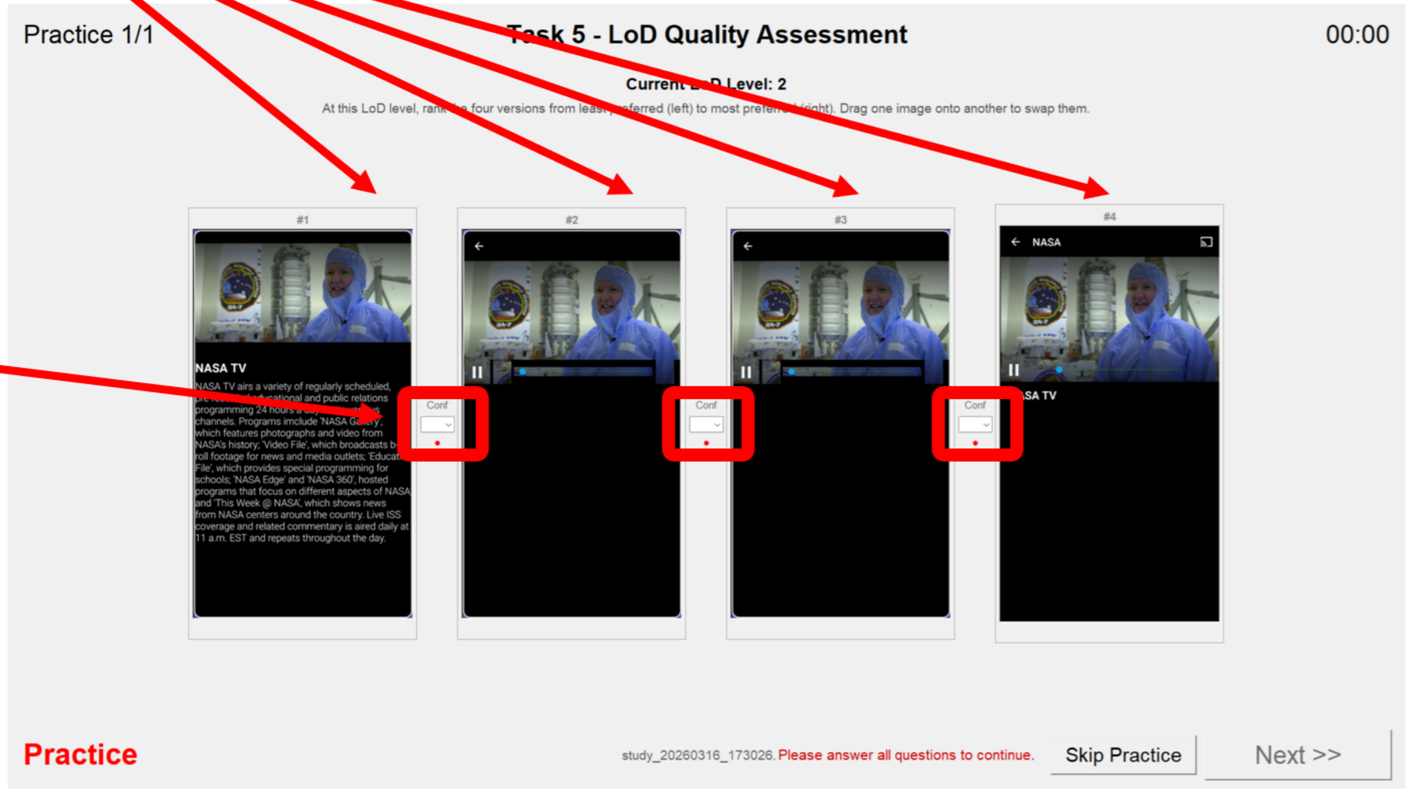
For the **Conf list**, rate the certainty between adjacent UIs:

7 → The complexity difference is very clear
1 → The difference is unclear or ambiguous

🧪 Task 5 — Rank UI Preference (4 UIs)

👀 **Look at the 4 UIs**

➡️ **Drag and drop them to rank based on your <u>preference</u>**



📊 Confidence Input

For the **Conf list**, rate the certainty between adjacent UIs:

7 → The complexity difference is very clear
1 → The difference is unclear or ambiguous
